Product Description

Product name: FAD/Coneyzme /Enzyme Cofactor/

Flavin Adenine Dinucleotide /FAD disodium

CAS No.: 84366-81-4

Product Purity: >93%

Product powder

appearance:

Product advantages

1.High purity: >93% 2.Orange powder 3.Fermentation process, green and environment friendly 4.Long shelflife: 24 months, product is stable 5.Heavy metal and microorganism meet food grade 6.Short delivery time: in stock product

Application field

1.New drug developement 2.Enzymatic reaction 3.IVD/Diagnostic Kits 4.Lab research purpose

FLAVIN ADENINE DINUCLEOTIDE

Leading Bulk FAD Manufacturer

SCOPE OF APPLICATION

Company Profile

Shenzhen Hygieia Biotechnology Co., Ltd. engaged in the research of biocatalysis and synthetic biology, focusing on the R & D, production and sales of new dietary nutritional supplement raw materials and medical beauty raw materials. In 2019, we realized the industrialization of high quality Nicotinamide Mononucleotide (NMN) which has been approved by US and Japan Test lab, with a number of independent intellectual property rights.

In the future, Hygieia will introduce computer Al-design technology into protein artificial assembly, and combine with new enzyme engineering technology to achieve more technological breakthroughs.

In addition, we actively participate in the research projects with domestic and foreign research institutions, help promote the progress of NMN in clinical research, continuously expand the research of NMN application and explore related indications, and provide more basic research data support for NMN industry chain!
