

99% NMN Chemical Longevity Ingredients 1094-61-7 Nicotinamide Mononucleotide

Our Product Introduction

for more products please visit us on antiageingingredients.com

Basic Information

Product Specification

- Product Name: β -Nicotinamide Mononucleotide
- Synonyms: β -NMN,,NMN
- CAS Number: 1094-61-7
- Molecular Formula: C₁₁H₁₅N₂O₈P
- Molecular Weight: 334.22
- Appearance/color: White Crystalline Powder
- Specifications: 99%
- Solubility: 50 Mg/ml In Water
- Package: 1kg/bag, 25kg/drum
- Highlight: **1094-61-7 NMN Chemical,**
99% Nicotinamide Mononucleotide,
1094-61-7 Longevity Ingredients

Product Description

Bulk NMN Powder 99%

What is NMN?

NMN, the abbreviation of Nicotinamide mononucleotide, is a nucleotide derived from ribose and nicotinamide. Like NR, NMN is a derivative of niacin .

Hygieia NMN Advantages

High Purity NMN

The purity of Hygieia NMN raw materials is 99% min, and up to 99.9%. Hygieia manufactures high grade NMN in the pure form of β -nicotinamide mononucleotide. A higher purity NMN powder means higher absorption and bioavailability

Third Party Tested

Hygieia NMN is 99% pure and each batch is tested in-house. Hygieia products are rigorously tested for purity. Our product is tested and verified by authoritative third-party testing organizations like CTI (Centre Testing International), Intertek, Eurofins, etc. COA results and third-party testing reports are all available.

Fully Stabilized

Normal NMN molecule will quickly break down when exposed to light, oxygen, or heat. NMN typically needs to be kept cold under refrigeration. Hygieia NMN powder comes in a shelf stable form at room temperature, no special conditions are needed for overseas transportation or storage.
